## OBJECTIVE

---

Software Engineer seeking a position where I can utilise my skills and experience in software development, and agile methodologies.

## EDUCATION

---

University of Technology Sydney | Bachelor of Engineering (Software)

June. 2022

## SKILLS

---

Languages: Java, JavaScript, TypeScript, C#, Python, SQL, HTML5, CSS3

Frameworks: React, Angular, Spring, Hibernate, Mockito, Jasmine

## EXPERIENCE

---

### Graduate Software Engineer

July. 2022 – Present

Symbio | Sydney, NSW

- Maintained and developed the software built using Java, Spring, and Hibernate.
- Developed automated tests using JUnit and Mockito to ensure code quality.
- Leveraged AWS services including Amazon S3, EC2, and Lambda to support application development.
- Executed queries and data changes using Elasticsearch, Logstash, and Kibana.
- Deployed application to production environments.
- Used Agile software to track tasks and progress including Jira and Confluence.

### Front-End Web Developer

October. 2021 – July. 2022

SeaLadder | Sydney, NSW

- Developed features on the site using Angular, HTML5, CSS3 (LESS), .NET (C#), and TypeScript.
- Created unit tests with Jasmine testing framework and Karma, and followed test-driven development.
- Participated in UI/UX design sessions and provided sufficient documentation.
- Employed knowledge of Git and debugged using Chrome Developer Tools.
- Seeded and migrated the database to create new features.

### Data Moderator

Jan. 2019 - Nov. 2019

ProductReview.com.au | Sydney, NSW

- Wrote SQL statements to modify and query data.
- Completed manual testing of site after each major release and update.
- Contributed, modified, and maintained data on the backend of the site.

## EXTRACURRICULAR

---

- Competitive soccer at Chipping Norton Soccer Club.
